Risk Management Cloud Based Software from Recordables

Take advantage of the Recordables Intake Portal to report an incident from anywhere.

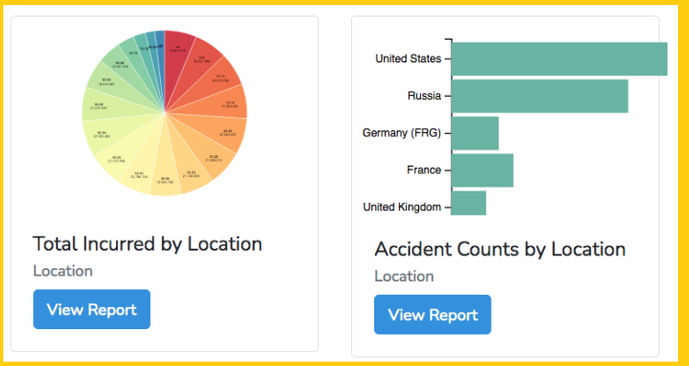
For nearly 30 years Recordables has been providing trusted software solutions to help organizations manage their risk management and insurance claims. Risk and claims managers benefit from comprehensive capabilities to achieve quick, accurate, compliant, and compatible data recording, tracking, and reporting.

Each risk management software solution from Recordables can be used as a stand-alone application or as part of a comprehensive RMIS solution that seamlessly integrates with each other.

TrackAlytics® featured below helps users in better decision making.

Insurance Dashboards

Effective insurance Dashboards for commercial insurance provide current, actionable information about liability and workers' compensation claims. The best dashboards provide drilldown capabilities that provide access to multiple levels of data, from a broad overview to specific claims. Insurance Dashboards are available as part of Recordables risk management software.



Powerful Drill Down Actionable Dashboards provide useful information at the aggregate level as well as detailed views.
