Risk Management Cloud Based Software From Recordables

Report an incident at the accident site to capture essential information without delay.
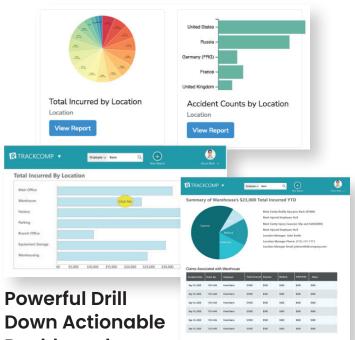

Incident Intake Portal Steps:

1. Portal user completes Incident Report at accident site.
2. Incident routed to Gate Keeper for review and action.
3. Portal users have ability to add pictures and videos.

For more than 30 years Recordables has helped government agencies, risk pools, self-insured organizations and insurance carriers manage their insurance claims process through our RMIS software. Recordables clients range from small businesses to insurance companies. No client is too small or too large.

PROVIDING YOU WITH THE INFORMATION YOU NEED TO STAY UP-TO-DATE ON WORKPLACE RISKS & SOLUTIONS.

Insurance Dashboards

Effective Insurance Dashboards for commercial insurance provide current, actionable information about liability and workers' compensation claims. The best dashboards provide drilldown capabilities that provide access to multiple levels of data, from a broad overview to specific claims. Insurance Dashboards are available as part of Recordables Risk Management Software.

Powerful Drill Down Actionable Dashboards
provide useful information at the aggregate level as well as detailed views.
